

World Maths Day 2022

Parent/Carer Competition

All entries must be submitted to me on Class Dojo by Tuesday 22nd March.

Can you tell me the answer to this number problem? All correct entries will be entered into a random prize draw with 3 prizes available to win!

- 36 people are staying in the 8 caravans.
- Each caravan has a different number of people staying in it.
- In each line of 3 caravans, there are a total of 15 people staying.
- No caravan is empty.

How many people could be staying in each caravan?

Good luck,

Mr Sam Williams
Deputy Headteacher
