

There are eight different game types available to play: five are single player and three are multiplayer.

Single Player

- **Jamming** – it is your choice whether you are answering multiplication and/or division questions here. If you only do multiplication or division, you earn 4 coins per answer. If you answer both multiplication and division questions, you earn 8 coins per answer. You can choose to answer 10, 20 or 30 questions – you can select your own tables too.
- **Gig** – You can only complete this once per month. You have 5 minutes to answer up to 100 multiplication questions. The gig ends when the time is up or you have answered all the questions, whichever comes first. Earn 10 coins per correct answer.
- **Garage** – earn 10 coins per correctly answered question. The times tables experienced here are set by your child's class teacher or the Rock Star algorithm works this out for you.
