# ICT Acceptable Use Policy

**Date Prepared:** January 2018

**Date Approved by Governing Body:** January 2018

**Date to be reviewed:** January 2019

*Giving children a flying start*

**CONTENTS**

## Introduction

Little Hill Primary School's acceptable use policy is divided into the following three sections.

1)      General policy and code of practice
2)      Internet policy and code of practice
3)      E-mail policy and code of practice

## Privacy

**In particular please note the provisions set out in this ICT policy about privacy and how the school may monitor data, information and material in relation to or used, sent or received by you.**

## Section One - General policy and code of practice Introduction

The school has well-developed and advanced ICT systems, which it intends that you will use and benefit from. The policy set out below sets out the rules that you must comply with to ensure that the system works effectively for everyone.

**PRIVACY**

**The school will try to respect your privacy but in order to protect pupils' safety and well-being and to protect the school from any third party claims or legal action against it, school may view any data, information or material on the school's ICT system (whether contained in an e-mail, on the network, notebooks or laptops) and in certain circumstances, disclose that data, information or material to third parties, such as the police or social services. You consent to the school viewing, using and disclosing data, information or material in relation to, used, sent or received by you.**

**The school disclaimer which automatically appears at the end of each of your e-mails notifies the recipient that any e-mail correspondence between you may be monitored. You must not remove this disclaimer. You should bring to the attention of any person who wishes or intends to send you an e-mail that the school may monitor the content of his e-mail.**

## Code of practice

| | |
|---|---|
| **Little Hill's philosophy** | In using ICT, you will follow the school's ethos and consider the work and feelings of others. You must not use the system in a way that might cause annoyance or loss of service to other users. |
| **Times of access** | The network is available during term time. Out of term time the network will be subject to maintenance downtime and so may not be available for brief periods. |
| **User ID and password and logging on** | You will be given your own user ID and password. You must keep these secret and not tell or show anyone what they are.<br>If you forget or accidentally disclose your password to anyone else, you must report it immediately to the ICT Technician .<br>You must not use another person's account or allow another person to use your account. The facilities are allocated to you on a personal basis and you are responsible for the use of the machine when you are logged on. The school's system records, and senior ICT staff monitor, your use of the system.<br>Use of the school's facilities by a third party using your user name or password will be attributable to you, and you will be held accountable for the misuse.<br><br>You must not log onto more than one computer at the same time. |
| **Printing** | The school may wish to check that expensive resources are being used efficiently and the member of staff may suggest other strategies to you in order to save on resources. |
| **Logging off** | You must log off from the computer you are using at the end of each of your sessions and wait for the standard login screen to reappear before leaving. This signals to the system that you are no longer using the service, it ensures security and frees up resources for others to use. |
| **Access to information not normally available** | You must not use the system or the internet in order to find or use facilities or flaws in the system that might give access to information or areas of the network not normally available. You must not attempt to install software to explore or harm the system. Use of hacking tools e.g. 'loggers', 'sniffers' or 'evidence elimination software' is expressly forbidden. |
| **Connections to the system** | You must not connect any hardware which may be detrimental to the school network. |

| Connections to the computer | You should use the keyboard, mouse and any headphones provided. You must not adjust or alter any settings or switches without first obtaining the written permission of a member of the ICT staff. You must never attempt to use any of the connectors on the back of any desktop computer. You may use USB memory stick ports, floppy disk and CD ROM drives where provided on the front of the computers. You are not permitted to connect anything else to the computer without first getting the permission of a member of the ICT staff. |
|---|---|
| Virus | If you suspect that your computer has a virus, you must report it to a member of the ICT staff immediately. |
| Installation of software, files or media | You must not install or attempt to install software of any kind to network drives or local hard drives of networked desktop computers. You must not alter or re-configure software on any part of the school's system. |
| File space | You must manage your own file space by deleting old data rigorously and by deleting emails that you no longer require. If you believe that you have a real need for additional space, please discuss this with a senior member of the ICT support staff. |
| Transferring files | You may transfer files to and from your network home directories using removable devices.  When transferring files to and from your network home directories, you must not import or export any material unless the owner of that material expressly permits you to do so. |
| Reporting faults and malfunctions | You must report any faults or malfunctions in writing to the ICT support staff including full details and all error messages as soon as possible. |
| Food and drink | You must not eat or drink nor bring food or drink, including sweets and chewing gum, into the ICT rooms. You must maintain a clean and quiet working environment at all times. |
| Copying and plagiarising | You must not plagiarise or copy any material which does not belong to you. |
| Copies of important work | It is your responsibility to keep paper copies and back-up copies on floppy disk, CD or memory stick of your work and, in particular, you must keep copies of any important work that you might have. |

## Section Two - Internet policy and code of practice Introduction

The school is able to provide access to the internet from desktop PC's via the computer network and through a variety of electronic devices connected wirelessly to the network. Whenever accessing the internet using the school's or your personal equipment you must observe the code of practice below. This policy and code of practice is designed to reduce and control the risk of offences being committed, liabilities being incurred, staff or other pupils being offended and the school's facilities and information being damaged.

Consequently any breach of this policy and the code of practice will be treated extremely seriously and it may result in disciplinary or legal action or expulsion. The school may take steps, including legal action where appropriate, to recover from an individual any expense or liabilities the school incurs as a result of the breach of this policy and code of practice by you.

## Why is internet access available?

The internet is a large and very useful source of information. Numerous websites and services, both official and unofficial, provide information or links to information which would be useful for educational purposes.

## Why is a code of practice necessary?

There are four main issues:
- Although the internet is often described as 'free', in fact there is a significant cost to the school for using it. This cost includes telephone line charges, subscription costs (which may depend on how much a service is used) and the computer hardware and software needed to support internet access.
- Although there is much useful information on the internet, there is a great deal more material which is misleading or irrelevant. Using the internet effectively requires training and self-discipline. Training is available on request from ICT staff.
- Unfortunately, the internet carries a great deal of unsuitable and offensive material. It is important for legal reasons, reasons of principle, and to protect the Trust's staff and the pupils that access to this unregulated resource is properly managed by the school. Accessing certain websites and services and viewing, copying or changing certain material, could amount to a criminal offence and give rise to legal liabilities.
- There is a danger of importing viruses on to the school's network, or passing viruses to a third party, via material downloaded from or received via the internet, or bought into the school on disk or other storage media.

## Code of practice

| | |
|---|---|
| **Use of the internet** | The Internet should not normally be used for private or leisure purposes; it is provided primarily for education or business use.<br><br>You may use the internet for other purposes provided that:<br><br>• Such use is occasional and reasonable;<br><br>• Such use does not interfere in any way with your duties and<br><br>• You follow the code of practice at all times. |
| **Inappropriate material** | You must not use the internet to access any newsgroups, links, list-servers, web pages or other areas of cyberspace that could be considered to be offensive because of pornographic, indecent, racist, violent, illegal, illicit, or other inappropriate content. "Inappropriate" in this context includes material which is unsuitable for viewing by school children. **You are responsible for rejecting any links to such material which may appear inadvertently during research.**<br>If you encounter any material which could be regarded as offensive you must leave that website or service immediately and not make any copy of that material. If you encounter any difficulty in leaving a website or service you must inform the ICT support staff immediately. |
| **Misuse, abuse and access restrictions** | You must not misuse or abuse any website or service, or attempt to bypass any access controls or restrictions on any website or service. |
| **Monitoring** | The internet access system used by the school maintains a record which identifies who uses the facilities and the use that you make of them. The information collected includes which website and services you visit, how long you remain there and which material you view. This information will be analysed and retained, and it may be used in disciplinary and legal proceedings. |
| **Giving out information** | You must not give any information concerning the school, its pupils or parents or any member of staff when accessing any website or service. This prohibition covers the giving of names of any of these people, the only exception being the use of the school's name and your name when accessing a service which the school subscribes to. |
| **Personal safety** | You should take care with whom you correspond. You should not disclose where you are nor arrange meetings with strangers you have got in contact with over the internet. |
| **Hardware and software** | You must not make any changes to any of the school's hardware or software. This prohibition also covers changes to any of the browser settings. The settings put in place by the school are an important part of the school's security arrangements and making any changes, however innocuous they might seem, could allow hackers and computer viruses to access or damage the school's systems. |

| Copyright | You should assume that all material on the internet is protected by copyright and must be treated appropriately and in accordance with the owner's rights. You must not copy, download or plagiarise material on the internet unless the owner of the website expressly permits you to do so. |
|---|---|

## 1. Section Three - E-mail policy and code of practice

**Introduction**

The **Little Hill Primary School'**s computer system enables members of the **Little Hill Primary School** to communicate by e-mail with any individual or organisation with e-mail facilities throughout the world.

For the reason outlined above, it is essential that a written policy and code of practice exists, which sets out the rules and principles for use of e-mail by all.

Any breach of this policy and code of practice will be treated seriously and it may result in disciplinary or legal action or expulsion. The **Little Hill Primary School** may take steps, including legal action where appropriate, to recover from an individual any expense or liabilities the **Little Hill Primary School** incurs as a result of the breach of this policy and code of practice by you.

## Code of practice

| Purpose | You should only use the **Little Hill Primary School'**s e-mail system for **Little Hill Primary School** related emails. You are permitted only to send a reasonable number of e-mails. |
|---|---|
| Trust's disclaimer | The **Little Hill Primary School'**s e-mail disclaimer is automatically attached to all outgoing e-mails and you must not cancel or disapply it. |
| Monitoring | Copies of all incoming and outgoing e-mails, together with details of their duration and destinations are stored centrally (in electronic form). **The frequency and content of incoming and outgoing external e-mails are checked from time to time** to determine whether the e-mail system is being used in accordance with this policy and code of practice.<br>The  <<CEO/ Headteacher/ Exectuive Headteacher/ Principal/>>, senior staff and technical staff are entitled to have read-only access to your e-mails. |
| Security | As with anything else sent over the internet, e-mail is not completely secure. There is no proof of receipt, e-mails can be 'lost', they can suffer from computer failure and a determined 'hacker' could intercept, read and possibly alter the contents.<br>As with other methods of written communication, you have to make a judgment about the potential damage if the communication is lost or intercepted. Never send bank account information, including passwords, by e-mail. |

| | |
|---|---|
| **Program files and non-business documents** | You must not introduce program files or non-business documents from outside onto the **Little Hill Primary School**'s network. This might happen by opening an e-mail attachment or by downloading a file from a web site. Although virus detection software is installed, it can never be guaranteed 100% successful, so introducing nonessential software is an unacceptable risk for the **Little Hill Primary School**. If you have any reason for suspecting that a virus may have entered the **Little Hill Primary School**'s system, you must contact the ICT support staff immediately. |
| **Quality** | E-mails constitute records of the **Little Hill Primary School** and are subject to the same rules, care and checks as other written communications sent by the **Little Hill Primary School** so, for example:<br>• You should always consider whether it is appropriate for material to be sent to third parties;<br>• they may have to be disclosed in legal proceedings;<br>• they may have to be disclosed to a person if he makes a request to see information held about him under data protection law;<br>• they require the same level of authorisation before being sent;<br>• printed copies of e-mails need to be retained in the same way as other correspondence;<br>• they are confidential to the sender and recipient, unless you have been given permission to read them;<br>• transmitting the works of others, without their permission, may infringe copyright;<br>• sending or storing messages or attachments containing statements which could be construed as improper, abusive, harassing the recipient, libelous, malicious, threatening or contravening discrimination legislation or detrimental to the  is a disciplinary offence and may also be a legal offence. |
| **Inappropriate e-mails or attachments** | You must not use e-mail to access or send offensive material, chain messages or list-servers or for the purposes of bullying or plagiarising work.<br>You must not send personal or inappropriate information by e-mail about yourself, other members of staff, pupils or other members of the **Little Hill Primary School** community.<br>If you receive any inappropriate e-mails or attachments you must report them to technical staff. |
| **Viruses** | If you suspect that an e-mail has a virus attached to it, you must inform the technical staff immediately. |
| **Spam** | You must not send spam (sending the same message to multiple e-mail addresses) without the permission of senior staff. |
| **Storage** | Old e-mails may be deleted from the **Little Hill Primary School** 's server after 12 months. You are advised to regularly delete material you no longer require and to archive material that you wish to keep. |
| **Message size** | Staff are limited to sending messages with attachments which are up to 2Mb in size. If you wish to distribute files within the **Little Hill Primary School**, you can do so by using shared areas. |

| Confidential Emails | You must ensure that confidential emails are suitably protected at all times. If working at home or remotely, you should be aware of the potential for an unauthorised third party to be privy to the content of the email. Confidential emails should be deleted when no longer required. |
|---|---|

## 2. E-MAIL POLICY – advice to staff

- Staff should remind themselves of the ICT AUP which relates to the monitoring, security and quality of e-mails. In addition staff should be guided by the following good practice:

- Staff should check their e-mails on a daily basis and respond, as appropriate, within a reasonable period if the e-mail is directly addressed to them
- Staff should avoid Spam, as outlined in the AUP.
- Staff should avoid using the e-mail system as a message board and thus avoid sending trivial global messages. Whilst accepting the convenience of the Staff Distribution list staff should try to restrict its use to important or urgent matters.
- Staff should send e-mails to the minimum number of recipients
- Staff are advised to create their own Distribution lists, as convenient and appropriate
- Staff should always include a Subject line
- Staff are advised to keep old e-mails for the minimum time necessary

## 3. Further guidelines:

- Remember - E-mails remain a written record and can be forwarded to others or printed for formal use
- As a rule of thumb staff should be well advised to only write what they would say face to face, and should avoid the temptation to respond to an incident or message by e-mail in an uncharacteristic and potentially aggressive fashion. Remember "Tone" can be misinterpreted on the printed page and once it is sent it could end up in the public domain forever. Email lacks the other cues and clues that convey the sense in which what you say is to be taken, and you can easily convey the wrong impression.
- Remember that sending email from your **Little Hill Primary School** account is similar to sending a letter on **Little Hill Primary School** letterhead, so don't say anything that might bring discredit or embarrassment to yourself or the **Little Hill Primary School.**.
- Linked with this, and given the popularity and simplicity for recording both visual and audio material, staff members are advised to remember the possibility of being recorded in all that they say or do.
